

# **2023 International Conference on Security and Information Technologies with AI, Internet Computing and Big-data Applications**

**Dec. 7-9, 2023, Chihlee University of Technology, New Taipei City.**

## **Greetings from SITAIBA 2023 Chairs**

In emerging technologies, artificial intelligence (AI) and network security have become the primary trends, and upcoming research will also focus on advancing these techniques and strategies. The 2nd International Conference on Security and Information Technologies with AI, Internet Computing and Big-data Applications (SITAIBA 2023) will be held on December 7-9, 2023, at the General Teaching Building, Chihlee University of Technology, New Taipei City, Taiwan. The conference aims to strength the international academic cooperation and communications, and exchange updated information, research ideas and practical experience with each other. It focuses on providing a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Security and Information Technologies with AI, Internet Computing and Big-data Applications. We are delighted to invite two keynote speakers, Prof. Koji Nakao from NICT Japan and Prof. Heung Youl Youm from Soonchunhyang University, Korea, who are proficient in the research of both network security and big-data applications, to share their in-depth research and insights. After rigorous paper review process, this year we accepted 48 excellent technical papers from a lot of paper submissions around the world to be presented in the conference.

Here, we would like to express our gratitude to ESAM, Chihlee University of Technology, National Institute of Cyber Security, and all sponsors and organizers who support our conference. Without their assistance, the conference would not have been so successful.

We warmly welcome all attendees to the conference, and hope that you can gain a lot of new knowledge and research inspirations through the conference, and have a pleasant time staying in Taiwan. Your participation makes a valuable contribution to the continuous growth and improvements of our conference.

Thank you again for your participation.

### **General Chairs**

**Shiuh-Jeng WANG**

**George A. Tsihrintzis**

### **Program Chairs**

**Chih-Hung Wang**

**Jung-San Lee**

**Taeshik Shon**

**Damien Sauveron**

**Chi-Yao Weng**
